VOLUNTARY SUPPORT OF EDUCATION 1987-1988

COUNCIL FOR AID TO EDUCATION

CFAE

FOREWORD

This 29th edition of **Voluntary Support of Education** differs in an important way from most of its predecessors. That is because it is the first survey report since 1975, and only the third in 25 years, to record a year-to-year decline in private giving to U.S. colleges and universities and independent elementary and secondary schools.

This was not unexpected; a year ago in this space we said, "...A slowdown is no surprise." Yet the real surprise may be that the decline was no larger than the 3.5 percent that we report in the pages that follow. After all, the drop in giving occurred after three years during which contributions to education rose by nearly $3 billion, at an astonishing — and unsustainable — annual rate of 15 percent. With the one-two punch of a new tax law followed by the 1987 Wall Street collapse, it's no wonder there was a decline in giving.

Therefore, we see the 1987-88 drop as more of a mid-course correction than a setback to the growth of private support of education. And there are some encouraging signs for the future. For one, the survey reveals that the number of alumni donors actually increased during 1987-88, as did the percentage of the national alumni body that gave to alma mater. Also, the total number of gifts from all donors appears to have risen as well.

It may be that double-digit percentage increases in giving are over for a time. But it does appear that the idea of "giving to the college of your choice" is alive and well.

Once again, we would like to thank our cosponsors, the Council for Advancement and Support of Education and the National Association of Independent Schools, as well as all the busy college and school officials who provided mounds of data that made this survey report possible.

And we offer a special salute to our good friend and colleague Jane F. Hammond, who as CFAE's director of research dealt with the mounds of data, shaping the survey and writing this report. Alas, Jane has left New York City for a new career as a college administrator (where you may be sure she will insist that CFAE questionnaires are filled out accurately and on time). In her three years at the Council, she brought vitality and immense integrity to our research enterprise, setting a good example for all. We wish her well.

June 1989

COUNCIL FOR AID TO EDUCATION CFAE

Voluntary Support of Education is published annually by the Council for Aid to Education, Inc. Additional copies are available for $35 each prepaid from the Council at 51 Madison Avenue, New York, NY 10010. (212/689-2400)

VOLUNTARY SUPPORT OF EDUCATION 1987-88

The Sponsoring Organizations

The Council for Aid to Education, Inc. (CFAE) is a not-for-profit corporation based in New York City and funded by contributions from business. It was established in 1953 as the instrument of the business community charged with encouraging private support of education. It provides consulting and research services, conducts workshops and seminars, produces periodicals and "how to" manuals, and sponsors the public service advertising campaign "Give to the college of your choice."

The Council for Advancement and Support of Education (CASE) is a professional educational association with 2,850 institutional members which offers programs of professional development and acts as a public affairs arm for U.S. education. Participants in its programs include fund raisers, alumni administrators, communicators, government relations officers and the managers of these functions in postsecondary and secondary institutions. CASE is headquartered in Washington, DC.

The National Association of Independent Schools (NAIS), Boston, is a nonprofit voluntary membership association of nearly 1,000 schools in the U.S. and overseas serving a total enrollment of 355,000 students. Its administrative and academic services to member schools include research reports, periodicals and manuals; an employment clearinghouse for school administrators; and leadership and professional development for teachers, administrators and school trustees.

National Estimates

Private contributions to U.S. colleges and universities fell to an estimated $8.2 billion in the 1988 academic year, ending a 12-year stretch of annual gains. The decrease of $300 million, or 3.5 percent, is the first dip in voluntary support since 1974-75. It interrupts a growth trend which had lifted voluntary support by an average 12 percent per year. Indeed, from 1983-84 to 1986-87 contributions rose by nearly $3 billion, an average annual growth of 15 percent.

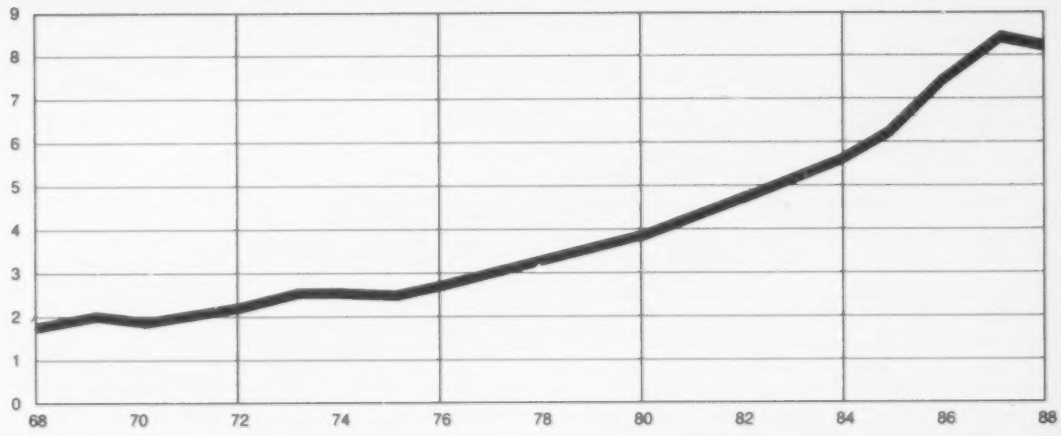
In spite of last year's slowdown, contributions have outstripped inflation by a wide margin since 1982-83, whether measured by the Consumer Price Index (CPI) or the Higher Education Price Index (HEPI). In terms of real purchasing power for the higher education dollar (HEPI), voluntary support declined 7.5 percent in 1987-88 but still managed an increase of nearly 25 percent over five years.

The decline in 1987-88 was primarily the result of a drop in individual giving. Alumni contributions, which had increased by more than 28 percent in 1986-87 — the largest increase ever for a single donor category — fell by $304 million, or 13 percent, in 1987-88. Contributions from other individuals — parents, trustees, faculty and friends — declined by almost 7 percent, or $139 million. Gifts from all individuals provided slightly less than half of total voluntary support, with alumni accounting for 24.9 percent and nonalumni 23.5 percent.

This compares with a 52 percent share of all funds contributed to colleges and universities in 1986-87, the highest since CFAE first began tracking voluntary support in the mid-1950s. The current estimate for individual giving is still 10 percent above its 1985-86 level.

Giving to higher education by individuals has fallen off only twice before in the past two decades.

Growth in Voluntary Support of Colleges and Universities, 1967-68 to 1987-88
(billions of dollars)



In 1969-70, as a result of tax law changes and stock market losses, gifts from individuals fell 7 percent. The oil crisis and recession of 1974 led to a 6 percent decline in individual giving in 1974-75.

A BOOM AND THEN A BUST

Two factors largely account for last year's drop. First, anticipated changes in the tax treatment of charitable contributions prompted an acceleration in donations at year's end in 1986 and helped spur the largest ever yearly increase in giving in 1986-87. As the new tax law took effect in 1987, it was almost inevitable that the contributions boom would level off as donors faced lower tax rates, elimination of the nonitemizer charitable deduction and changes in the treatment of gifts of appreciated property. In addition, the jolt to donor confidence caused by the October 1987 stock market collapse affected major gifts and interrupted the momentum of major fund-raising campaigns at campuses across the country.

While individual giving was dropping, foundation grants were growing. These accounted for the largest dollar and percentage gains by any donor group — up $94 million, or 6 percent, to a total of $1.6 billion. As a result, the foundation share of total higher education support grew to nearly 20 percent, reversing a downward trend which had prevailed for the past four years. The extraordinary gains of the stock market prior to October 1987 caused a dramatic increase in the assets of the nation's foundations, and they are required by law to pay out an amount equal to at least 5 percent of their assets.

Corporate contributions to colleges and universities increased slightly to $1.853 billion, accounting for 22.6 percent of all gifts. The 1.9 percent increase was the smallest since 1974-75. Between 1974-75 and 1984-85 corporate giving grew at an unprecedented average annual rate of 14.4 percent. Given sluggish profits in key industries and the continued restructuring in the corporate community, however, the recent slowdown was hardly unexpected.

Table 1. Estimated Voluntary Support, by Source and Purpose (millions of dollars)

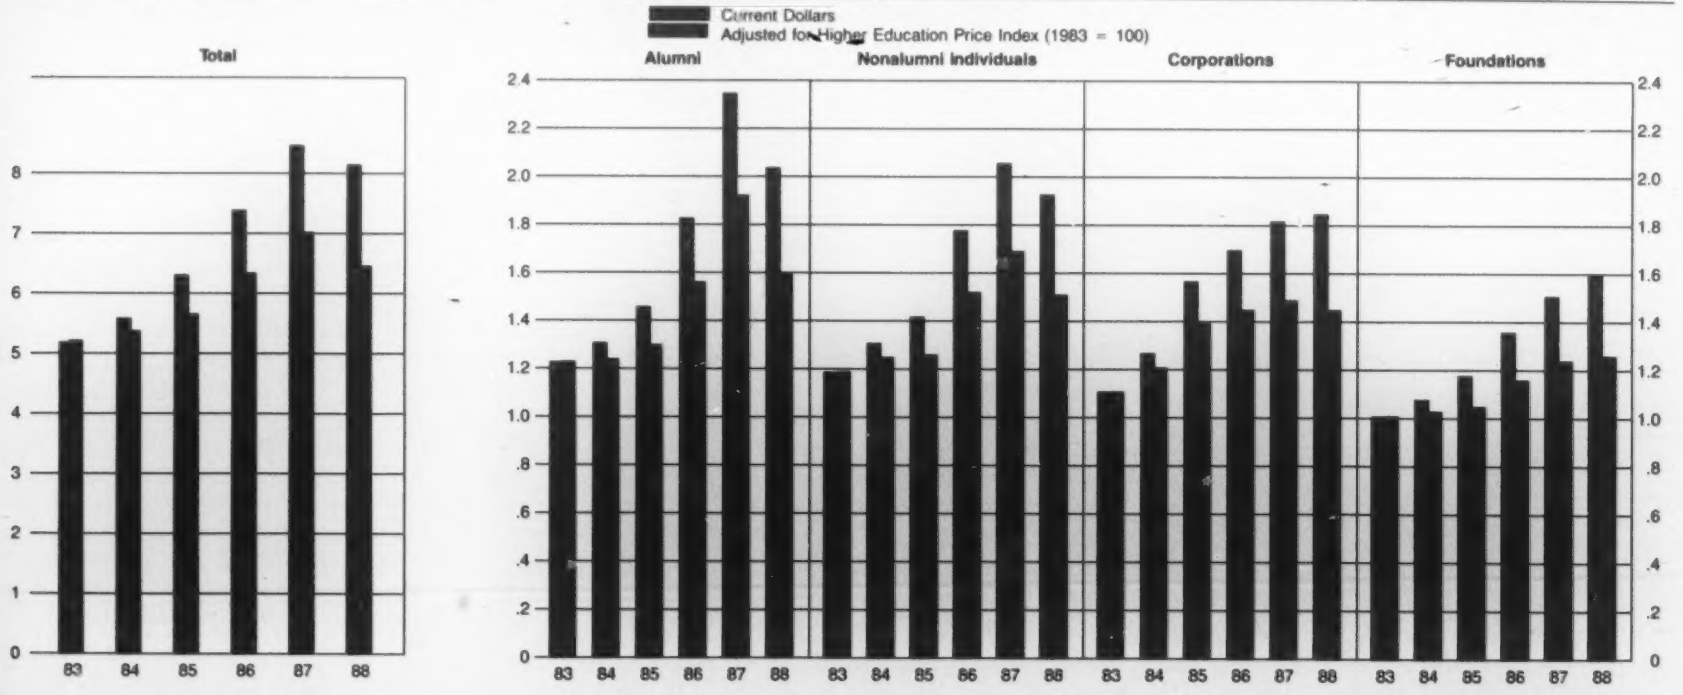
Figures in parentheses are percentages of total.

Gifts from religious organizations registered an absolute decline to $197 million, falling for the second year in a row. Since the late 1950s religious groups have provided a shrinking share of total support; in 1987-88 they accounted for 2.4 percent of total giving, compared to 10.5 percent in 1957-58.

Finally, support from "other organizations" — clubs, trade unions, state and regional fund-raising consortia — grew by 4 percent to $574 million. They accounted for 7 percent of all gifts in 1987-88, a share which has remained fairly constant over time.

A breakdown of the national estimates by type of giving reveals that all of the decline in 1987-88

Estimated Voluntary Support of Colleges and Universities, Total and by Major Source, 1982-83 to 1987-88 (billions of dollars, years ending June 30)



stemmed from a fall in gifts for capital purposes. Such gifts — for buildings, endowment, equipment — fell by $546 million, or 13.4 percent. On the other hand, contributions for current operations — annual fund, scholarships, etc. — increased by $246 million, or 5.6 percent.

As a result, the share of support designated for capital purposes was down by five percentage points to 43 percent of total support, reversing a pattern over the previous three years that saw capital gifts growing faster than those earmarked for current operations. During this three-year period, capital contributions rose at a spectacular rate of 23 percent per year on average, while support for on-going operations increased by 9 percent on average.

Further analysis of capital giving last year indicates that the decline resulted from a decrease in outright and deferred gifts by living donors. Indeed, the loss would have been sharper had it not been for an increase in the value of bequests received in 1987-88. Since large gifts — frequently in the form of appreciated property, including stock — dominate capital giving, their falloff is strong evidence that the new tax law and the 1987 stock market debacle were the prime causes of reduced support from individuals. Donors of major gifts are known to be sensitive to timing, and it is logical to assume that the unsettled stock market at the end of 1987 induced some to postpone their support.

SUPPORT PER STUDENT FALLS

Viewed in the perspective of increasing college and university enrollment and rising institutional budgets, the 1987-88 decline in voluntary support constitutes a sharp reversal of several important relationships. In particular, voluntary support declined in relation to enrollment and in relation to institutional expenditures (see **Table 2**).

Voluntary support per student, which had been rising rapidly since the mid-1970s, fell from $678 in 1986-87 to $638 in 1987-88, a decline of 5.9 percent. (When adjusted for inflation, the decline amounted to 9.5 percent.) Per student support, adjusted for inflation, reached a post-World War II peak in the late 1960s; it dropped sharply during the early 1970s and subsequently recovered about half the decline.

Table 2. Voluntary Support in Relation to Enrollment, Inflation and Institutional Expenditures

				Institutional Expenditures			Estimated Voluntary Support

1970-71 to 1975-76	5.4	6.9	6.6	9.6	4.0	−2.7	5.3	− 0.2	−6.6	
1975-76 to 1980-81	1.6	9.4	8.3	10.2	8.4	−0.9	11.9	10.2	0.8	
1980-81 to 1985-86	0.2	4.6	6.6	8.9	8.6	3.8	11.8	11.5	6.6	
1986-87 to 1987-88	2.4	4.1	4.3	6.0	3.5	−0.6	− 3.5	− 5.9	−9.5	

Although the growth of college and university budgets was slower in 1987-88 than it had been generally since 1949-50, the absolute decline in voluntary support also resulted in a drop in support as a percentage of institutional expenditures. This ratio, which showed a steady decline from 9.6 percent in 1949-50 to 5.7 percent in 1975-76, had been rising slowly during the late 1970s and early 1980s. In 1986-87 it stood at 7.3 percent; in 1987-88 it fell back to 6.7 percent.

Total expenditures of colleges and universities, including both operating and capital outlays, are estimated to have been $122.9 billion in 1987-88, roughly 6 percent higher than in 1986-87. This is the smallest year-to-year increase since 1950 and is much lower than the average increase of 10.8 percent per year that characterized the last four decades. Moreover, while the increase in institutional expenditures was greater than either of the price indexes in 1987-88, it was smaller than the combined effect of enrollment growth and inflation. As a result, expenditures per student, adjusted for inflation, showed a decline of 0.6 percent.

None of these changes necessarily heralds a reversal of prior trends. As suggested above, voluntary support was somewhat inflated in 1986-87 by the effects of the Tax Reform Act of 1986, and the 1987-88 decline may therefore constitute a kind of correction. Given a continuation of healthy economic conditions, a stable tax environment and the persistence of aggressive fund-raising efforts on the part of colleges and universities, voluntary support of higher education very likely will show some modest growth in the immediate future.

The 1987-88 Survey

The national estimates of contributions to higher education set forth on the preceding pages are based on the data supplied by the colleges and universities participating in the annual survey of voluntary support of education. There were 1,142 such institutions that took part in the 1987-88 survey. They reported a total of $7.04 billion in private gifts, grants and bequests, or 85.9 percent of the estimated $8.2 billion in voluntary support raised by all colleges and universities; this percentage is consistent with the historical record.

Participation in the 1987-88 survey, by roughly 33 percent of the college and university population, was about the same as it has been for many years. On the average, the participating institutions have accounted for roughly 85 percent of all voluntary support to higher education. Among the various categories of educational institutions, by type and control, however, there are marked differences in participation rates and the relative importance of amounts reported (see page 14).

REVISED CLASSIFICATIONS

The classification of institutions in this report is changed from that used in past years. As a result of the U.S. Department of Education's abandonment of its 1981 classification of colleges and universities, CFAE has adopted the classification developed by the Carnegie Foundation for the Advancement of Teaching, and combined its ten college classifications into four categories (see glossary on page 15). The Carnegie classification, which is based on institutional program offerings and degrees conferred, resulted in the reclassification of many institutions relative to the 1986-87 and prior surveys.

Table 3 shows, by Carnegie classification, the number of reporting institutions, total voluntary support and average voluntary support per institution for both 1986-87 and 1987-88 on a consistent basis, together with year-to-year percentage changes in voluntary support.*

WHO RAISED THE MONEY

The general outline of these data is the same as it has been for many years: the four-year colleges and universities account for roughly 99 percent of total reported support, and the private institutions accounted for most of the support reported by all four-year colleges. The 183 institutions classified as Research/Doctoral raised two thirds of the funds reported by all 1,142 participants.

The most significant fact shown on Table 3 is that all classes of private institutions reported decreased support in 1987-88, while the public colleges and universities generally reported year-to-year increases. While this specific finding is unusual, the general pattern of change over the past two decades has been faster growth in voluntary support for the public institutions than for the private. Moreover, there has been an increase of 92 public institutions participating in the survey. As a result, the privates' share of the total amount reported has fallen from 80 percent to 64 percent.

With respect to the institutional categories, the 71 private doctorals led the way with $2.54 billion in gifts, averaging $36 million per institution. The public doctorals came second with $2.14 billion, or $19 million per school, followed by the 336 private liberal arts schools with $1.07 billion, an av-

*The data shown in Table 3 are also available according to the U.S. Department of Education's classification as used in the 1986-87 and prior survey reports. Readers interested in seeing these tabulations should write to CFAE.

erage of $3 million per college. The range in average support for the comprehensive and specialized institutions extended from a high of $8.0 million for the public specialized schools to $1.4 million for the public comprehensives. The public liberal arts colleges raised $1.3 million dollars on average per institution. These patterns are similar to those for 1986-87.

Just 11 percent of 1,367 two-year colleges nationwide responded to the survey; 25 were private junior colleges and 125 were public community colleges. This represents a decrease of 16 institutions from 1986-87. The two-year colleges reported private contributions of $68.4 million, with the private institutions raising $19.7 million, or $789,000 per institution, and public community colleges $48.7 million, or $389,000 per institution.

PATTERNS OF CHANGE

For the first time since the Council's 1974-75 survey, responding institutions reported a decrease in total voluntary support. The $7.0 billion raised by 1,142 institutions was $282 million, or 3.8 percent, less than that reported by 1,174 institutions in 1986-87. Even with the decrease, total reported support has grown at an average rate of almost 12 percent per year over the decade. This year's total support is more than three times the $2.3 billion reported by 1,065 institutions in 1977-78.

Since the number of survey respondents varies from year to year, two types of analysis are necessary to show changes. Using an average per institution corrects for different numbers of respondents in each year, but it does not correct for changes in the composition of the sample. And selecting those institutions participating in both the 1987-88 and the 1986-87 surveys — the "core" group, which includes 88 percent of all respondents — shows actual year-to-year variations for a consistent, but smaller, subset of the sample. **Table 3** presents changes in support by type of institution using both methods.

Average support per institution, $6.2 million, fell marginally by 1.2 percent. Twenty years ago, the average was $1.3 million. By classification, public research/doctoral and comprehensive institutions showed small increases; both sets of two-year institutions showed large gains; and all others showed decreases ranging from 1 percent to 15 percent.

The 1,004 core institutions raised $6.8 billion in total support, down $262 million, or 3.7 percent, from the prior year. All categories of public institutions reported increases, all privates decreases.

WHO DONATED THE FUNDS

Contributions from alumni and nonalumni individuals fell across the board in 1987-88. Despite this decline, alumni constituted the largest single donor group for the third consecutive survey, 24.9 percent of the total, as shown in **Table 4.** For the 1,004 core institutions (see **Appendix Table B**), alumni gifts fell by 15.9 percent for the privates, 7.1 percent for the publics and 13.6 percent overall.

Donations from nonalumni individuals — faculty, trustees, parents, and other friends — comprised 23.6 percent of total giving, second after alumni. For both the private and the public institutions, the core sample shows smaller decreases than for alumni, 9 percent and 2 percent, respectively, and 7 percent overall.

More than two thirds of the total from individual donors go to the private-sector colleges and universities.

Corporate contributions overall increased at a snail's pace in 1987-88. The rise was just $25.6 million, or 1.6 percent for the sample as a whole. While corporate giving increased at an average annual rate of 17 percent between 1975-76 and 1985-86, there has been a marked slowdown in

(Figures in parentheses show percent of total in each column.)

the past two years with corporate grants increasing by only 5 percent on average.

Corporations contributed almost 23 percent of the support received by all participants in 1987-88, up slightly from 21 percent in the previous year.

For the four-year institutions, corporate support was split almost evenly between the private and public sectors, with the privates receiving 49.9 percent of corporate funds, the publics 50.1 percent. Over the past 30 years the public-institution share in corporate support has risen steadily from less than 25 percent to 50 percent.

Even though the two-year schools received only 1.5 percent of the corporate dollar, this was still a larger share than from alumni, other individuals and foundations, as shown in **Table 4a.** The lion's share of corporate grants to two-year institutions went to public community colleges, and they received 45.5 percent of their total private support from corporations. A regional headquarters building valued at $8.6 million given by the Allstate Insurance Company to St. Petersburg Junior College accounted for nearly two fifths of the $22.2 million in corporate money donated to the public two-years in 1987-88.

For the core group of institutions participating in both the 1986-87 and 1987-88 surveys, corporate donations increased by just 0.6 percent (compared to 8 percent in 1986-87). Within the core there were major differences between the private and public institutions. The private sector experienced a 6.1 percent decrease, largely reflecting the one-time property gift from RJR Nabisco to Wake Forest University in the previous year.

On the other hand, corporate giving to the public institutions showed a gain of $59 million, or 8.3 percent. The public research/doctoral institutions recorded the largest dollar increase; their corporate grants rose by $43.3 million. All of the increase for the public two-year schools is accounted for by the $8.6 million property gift cited above. Without this gift, corporate support to the two-year public core institutions would have fallen by 4.6 percent.

In terms of forms of giving, there was a substantial $74.7 million, or 7 percent, increase in cash gifts (exclusive of matching) in 1987-88. This increase more than made up for a decrease in the value of gifts of company products and property.

Foundation grants accounted for a 19.6 percent share of total support, up from 17.8 the previous year. Two thirds of these grants went to the private institutions, one third to the publics. Among the core group, foundation support increased by 4.3 percent for the privates, 12.8 percent for the publics and 6.9 percent overall. The major increase for the private institutions was in gifts to the liberal arts schools; they enjoyed an increase of $24.5 million, or 14.3 percent. Among the public institutions, foundation grants to the research/doctorals increased by $38.1 million, or 10.1 percent; liberal arts $487,000, or 56.1 percent; and specialized $17.7 million, or 38.4 percent.

A total of $172 million in gift income came from **religious organizations** in 1987-88. This represents 2.4 percent of total support, unchanged from the year earlier. Ten years ago religious support made up 5 percent of total gifts. For the core institutions, donations from religious groups rose by almost $8 million, or 5.2 percent. The largest share of religious support, 39 percent, goes to the private liberal arts colleges.

Contributions from other organizations — clubs, unions, fund-raising consortia, etc. — accounted for almost 7 percent of total reported gifts. The core institutions reported a gain of $23 million, or 5.2 percent, practically all of which was reported by the research/doctoral institutions.

SPECIAL FORMS OF GIVING

Over and above the total dollars raised from each major donor group, the CFAE survey also collects data on particular types of giving and tracks them over time. Included are bequests and deferred gifts from individuals, matching gifts from corporations and noncash gifts from both businesses and other sources.

Bequests. Proceeds from estate settlements amounted to $860.4 million in 1987-88, a $104 million increase over the previous year. As a result, bequests accounted for 25 percent of individual giving, their highest share since 1981-82 when $115 million was received by two institutions from a single estate. The proportion of contributions in the form of bequests varies randomly over time (**Table 5** presents data for the last decade).

In 1987-88 five institutions reported very large estate settlements. Georgia Institute of Technology received $37.8 million from the estate of George Woodruff, and four California institutions

1986-87	3,795,699	756,795	(19.9)	425,297	(11.2)
1987-88	3,409,517	860,398	(25.2)	261,621	(7.7)

(Figures in parentheses show percent of all individual gifts.)

— California Institute of Technology, Loyola Marymount College, Pomona College and Stanford University — each reported gifts on the order of $20 million from the estate of Liliore Green Rains.

If it were not for these large bequests, the 1988 fall in total individual giving would have been much greater than it was. Data for the core institutions show that gifts from living donors fell by 16 percent. Counting all individual contributions, including bequests, the decrease was 11 percent.

Appendix Table A provides details on bequests designated for current operations and for capital purposes by type of institution. Private institutions received almost three fourths of all bequest dollars in 1987-88, the research/doctoral institutions leading with $317 million and the liberal arts colleges next with $187 million. About 71 percent of all estate settlements were designated for capital purposes, down from 75 percent in 1986-87.

Deferred Gifts. After reaching a record high both in dollars and as a share of individual gifts in 1986-87, these "planned gifts" — such as charitable remainder trusts, pooled income funds and gift annuities — fell precipitately in 1987-88. A total of $261.6 million was reported, $164 million or 38.4 percent less than in 1986-87. This amount represents 7.7 percent of the total support received from individuals, down from an unusually high 11.2 percent in the previous year. **Table 5** tracks deferred gifts over time, and **Appendix Table A** presents details by type of institution. Just over three quarters of these gifts went to the private institutions; the private research/doctoral universities and liberal arts colleges showed the largest decreases — $69 million and $52 million, respectively.

Matching Gifts. Support received from business corporations through employee matching-gift programs leveled off in 1987-88 after rising at an extraordinary average annual rate of 21 percent from 1976-77 to 1986-87. Colleges and universities reported receiving $128.6 million in 1987-88, off 0.3 percent from the previous year. While there were 23 fewer schools reporting data this year, Harvard University, which reported $3.5 million for 1987-88, did not report matching-gift amounts in the previous survey. Matching gifts continued to account for about 8 percent of total corporate support, having expanded from $4.2 million, or 2 percent of all corporate grants, when the survey began collecting these data in 1966-67. Clearly, the cutback in individual giving is reflected in this year's slowdown in matching-gift dollars.

As shown in **Table 6**, matching-gift monies are particularly important to the private liberal arts institutions, accounting for 32 percent of corporate grants in 1987-88. Overall, because these gifts are triggered by gifts from individuals, matching-gift programs send more money to private-sector institutions than to the publics.

Noncash Corporate Gifts. Colleges and universities reported lower levels of in-kind business

(Numbers in parentheses show the number of colleges and universities reporting corporate support.)

* Because many companies match gifts at a ratio of $2 or sometimes $3 for every employee dollar, the average match is estimated to be about one third more than the employee's gift.

† Data on matching gifts for these institutions are skewed due to the small number of institutions reporting and a very few reporting sizable individual matches.

contributions in 1987-88 than in the previous year. These gifts, which take the form of company products and surplus property and equipment, totaled $286.7 million, or 18 percent of the total corporate support reported by participants.

Gifts of company products were valued at $181.7 million, down $34 million from the $215 million reported in 1986-87. This was the second year in a row that these donations have fallen. The public research/doctoral universities, up $5 million, were the only category to report an increase. (Details by type of institution can be found in **Appendix Table A.**)

Corporate property gifts — usually large, nonrecurring contributions of land, buildings and equipment — dropped by $34 million to $105 million, about 7 percent of total corporate support in 1987-88. But the 1986-87 total included the RJR Nabisco gift of a $40 million building. A significant part of the $10.8 million going to the public two-year institutions was accounted for by the gift of a building from Allstate Insurance Company to St. Petersburg Junior College.

Other property gifts come primarily from individuals; they include gifts of land, houses, paintings, antiques and rare books. In 1987-88 the total reported value of these gifts was $203 million, a $29 million decrease from the amount reported in the previous year. This was the first time that the value of property gifts has fallen since the survey began collecting these data in 1983-84 — no doubt another result of changed tax treatment of gifts of appreciated property.

WHERE THE FUNDS GO

Table 7 shows voluntary support by purpose for colleges and universities participating in the 1987-88 survey, with comparative data for the previous year. Contributions for current operations showed an increase, while donations for capital purposes — buildings, equipment and endowment — dropped. As a result, the share of total support designated for operating expenses rose to 57 percent, while capital donations fell by 5 percentage points to 43 percent of total contributions.

The $484 million decline in capital gifts reported in 1987-88 followed two years of spectacular increases: Capital support surged by more than $600 million each year, an average annual increase of 16 percent. The large capital fund-raising campaigns under way at many institutions powered this upsurge in capital support.

The 1987-88 fallback was most pronounced for the private-sector institutions. Capital donations fell for all types of private core institutions, with the research/doctoral, comprehensive and liberal arts colleges each declining by more than $100 million in capital grants. On the other hand, capital contributions to the public-sector core group increased marginally, up 1.6 percent. The research/doctoral universities were the only public institutions to see a drop in capital support, $12 million, or 2 percent.

No. Institutions Reporting	1,174		1,142			1,004

(Figures in parentheses show percent of total in each column.)

Historically, the private institutions have received a far greater proportion of their gift income as capital support, while the publicly controlled schools have tended to receive a greater share for current operations. In 1987-88, 47 percent of all funds raised by the private institutions were earmarked for capital purposes, down from 53 percent in 1986-87. For the publics, capital support made up only 37 percent of total contributions, the same share as the previous year.

About three fifths of all capital support was designated for the institutions' endowment funds; of that, about 82 percent was restricted by the donors as to the uses of the endowment income. These proportions were similar for both private and public institutions.

Examining the purposes of grants by specific donor groups reveals that individuals earmarked 46 percent of their contributions for current operations; corporations and foundations — which generally avoid capital gifts — gave 68 percent and 61 percent respectively. More than half of the corporate and foundation grants for current operations were restricted, with research receiving the lion's share. On the capital side, three quarters of the gifts from individuals were directed to the institutions' endowments. Three fifths of the capital funds from corporations and half of those from foundations were earmarked for property, building and equipment .

More and more, donors are restricting the uses to which their gifts are put. In 1987-88, 73 percent of the gifts to private institutions were designated for specific purposes; for the public institutions it was significantly higher — 90 percent.

Colleges were asked to provide details about the use of restricted gifts for both current operations and endowment. **Table 8** presents the results for those institutions that could supply these details. The amounts reported represent 93 percent of all gifts restricted for current operations and 86 percent of the funds for endowment. The distribution is comparable for private and public institutions, and quite similar to the 1986-87 survey.

Research received the largest amount — $1.1 billion of $4.0 billion — for a 26.4 percent share of the total restricted funds reported. More than 90 percent of these research funds went for current operations rather than to endowment. Donors designated a fifth of their restricted contributions for student financial aid, and most of these dollars went into the institutions' endowments. Contributions for academic divisions — schools and departments — made up 18 percent of the total, up slightly from 1986-87. Support for libraries, public service and extension activities and physical plant each received less than 3 percent of total restricted support.

Table 8. Support with Restrictions on its Use for Current Operations and for Endowment for Institutions Reporting these Data, 1987-88 (000 omitted)

Purpose	Current Operations — Restricted Purposes			Endowment — Restricted Uses of Income			Grand Total

(Figures in parentheses show percent of total in each column; details do not always add up to totals because of rounding.)

SIZE OF GIFTS

Participating institutions provided details about gifts for current operations that were under $5,000, or $5,000 and over. **Table 9** shows the totals, by type of institution. The dollar amounts represent 74.8 percent of total support from individuals for current operations as reported by all survey respondents.

Gifts under $5,000 provided larger total amounts than did gifts of $5,000 and over for all institutional types save for the private research/doctoral universities. Although gifts of $5,000 and over constituted but a fraction of the number of gifts (0.5 percent), they accounted for 43.6 percent of all the monies received. In 1986-87, gifts over $5,000 represented 44.7 percent of the total. The research/doctoral universities secured about three fifths of all the funds generated by gifts over $5,000.

Average gift size cannot be calculated from the data shown because not all respondents reported both the number and dollar amounts of the gifts. Data from those institutions that provided complete answers suggest that for gifts of less than $5,000 the average was $130 for the private colleges and universities and $94 for the publics. For gifts over $5,000, the average gift was $22,089 for the privates, $20,407 for the publics.

Details on alumni gifts for current operations showed gifts over $5,000 accounting for 34 percent of alumni support; for nonalumni, 54 percent of the total support.

ALUMNI GIVING

To facilitate analysis of alumni fund raising, colleges and universities report additional data on the number of alumni of record, the number actually solicited and the number making a gift. These data are used to calculate the percentage of donors relative to the number actually asked for support — the "solicitation-effectiveness rate" — and average gift size.

Of 21.7 million alumni solicited by the colleges and universities reporting these data for 1987-88, 5.0 million, or 22.9 percent, made a gift. In 1986-87, 20.8 million were solicited with 4.8 million, or 22.2 percent, making a donation. **Appendix Table A** provides details by institutional type.

Table 10 shows the number of alumni donors, solicitation effectiveness and average gift for institutions that provided these data for 1987-88, with comparative data for 1986-87.

Almost all classes of colleges and universities reported more donors. (The decrease for the private specialized and two-year institutions is due to fewer institutions reporting.) The private liberal arts colleges reported the highest effectiveness rate, 34 percent; the public community colleges the lowest, 7 percent. For all private institutions, the solicitation-effectiveness rate was 28 percent compared to 18 percent for the publics.

Across all categories of institutions, the average size of alumni gifts fell in 1987-88. (The data for the public liberal arts schools are skewed by the small number of institutions reporting and the presence of one school which reported a gift average of about $1,000 for both years.) Overall, the average alumni gift was $327, down 16 percent from the previous year. The drop was more pronounced for the private-sector institutions, which reported an average alumni gift of $408, almost twice as large as the average $212 gift to the public institutions.

* These data reflect the amounts reported only for those institutions providing complete answers.

Alumni giving for ongoing operations — typically to the annual fund — was also lower in 1987-88. Data on this form of giving are presented in **Table 10a.** While almost all institutions reported more gifts, the average contribution fell to $150 from $159 the previous year. Average gift size ranged from a high of $214 for the private doctoral institutions to a low of $37 for the public liberal arts colleges.

TECHNICAL NOTES

Voluntary Support of Education is designed to obtain information on the amounts, sources and purposes of private gifts, grants and bequests received by educational institutions. Voluntary support excludes income from endowment and other invested funds as well as support received from federal, state and local governments and their agencies.

The 1987-88 survey collected data on funds raised from private sources for the fiscal year beginning July 1, 1987 and ending June 30, 1988. Questionnaires were mailed to roughly 2,800 colleges and universities and 900 independent elementary and secondary schools. College and university participation, at 1,142, was 2.7 percent below the 1986-87 level, with 16 fewer four-year and 16 fewer two-year participants. The number of elementary and secondary schools bettered last year's all-time high, reaching 546.

In no year since the survey was begun in 1954-55 have as many as half of the institutions of higher education responded. In recent years, the actual response has numbered between 1,100 and 1,200 colleges and universities out of nearly 2,800 invited to participate; the 1987-88 response rate was 33.7 percent. Despite yearly changes in both size and composition of the group of institutions taking part in the survey, the Council estimates that the amounts reported have averaged about 85 percent of the total voluntary support received by all colleges and universities.

Survey participation varies greatly by type and

control of institution. For this year's report, CFAE has adopted the classification developed by the Carnegie Foundation for the Advancement of Teaching, which is based on institutional program offerings and degrees conferred (see facing page). The composition of the 1987-88 sample was as follows:

Type and Control	Number*	Number Responding	Response Rate (%)
Research/Doctoral	213	183	85.9
Private	79	71	89.9
Public	134	112	83.6
Comprehensive	595	345	58.0
Private	264	191	72.3
Public	331	154	46.5

DETAILS OF SUPPORT BY PARTICIPATING INSTITUTIONS

Definitions of Classifications

Colleges and Universities

Research/Doctoral Institutions: Carnegie identifies four categories of universities ("Research I and II," "Doctorate-Granting I and II"), classified by the amounts of federal research support received and numbers of Ph.D. degrees awarded each year. The four are combined for the purposes of the survey.	**Research/Doctoral Institutions — Private**	16
	Research/Doctoral Institutions — Public	18
Comprehensive Institutions: There are two Carnegie categories of these colleges and universities offering bachelor's degrees (half in professional or occupational disciplines) and usually master's degrees as well. Category I enrolls more than 2,500 students; II between 1,500 and 2,500.	**Comprehensive Institutions — Private**	22
	Comprehensive Institutions — Public	30
Liberal Arts Institutions: Two categories of primarily undergraduate colleges (one more selective than the other) that award more than half of their bachelor's degrees in arts and science fields.	**Liberal Arts Institutions — Private**	34
	Liberal Arts Institutions — Public	46
Professional and Specialized Institutions: These are baccalaureate and postbaccalaureate institutions with programmatic emphasis in a single specialized field such as business, theology, engineering, law, medicine, art.	**Professional and Specialized Institutions — Private**	48
	Professional and Specialized Institutions — Public	50
Two-Year Institutions: These community, junior and technical colleges offer certificate and degree programs through the Associate of Arts level and with few exceptions do not offer the baccalaureate degree.	**Two-Year Institutions — Private**	52
	Two-Year Institutions — Public	52

Independent Schools

Boarding schools: Schools enrolling 95 percent or more boarding students.	**Independent Elementary and Secondary Schools**	58
Boarding/day schools: Schools enrolling between 50 and 94 percent boarding students, with the balance day students.		
Day schools: Schools enrolling 95 percent or more day students.		
Elementary schools: Schools with students in any grade PS-9, but none in grades 10-PG (*e.g.*, PS-6, K-9, 6-9)		
Secondary schools: Schools with students in any grades 10-PG, but none in grades PS-6 (*e.g.*, 7-12, 9-12, 7-PG)		
Elementary/secondary schools: Schools with students in any grades PS-6 *and* any grades 10-PG (*e.g.*, K-12, 5-12, 1-10)		

Technical Notes:

A. In the listing on the following pages, "Educational and General Expenditures" does not show the total operating expenditures of the reporting institutions; it excludes the operating costs of dormitories, dining halls, student stores, and other "auxiliary enterprises" as well as all outlays of a capital nature.

B. If the column is blank, school did not provide information. Blanks can be interpreted as either information is not available or no support was reported.

C. In some instances the number of institutions listed is greater than the number tabulated, for two reasons: 1) some multicampus institutions are shown in summary as well as in detail; and 2) some of the component professional schools of major institutions are also listed separately.

Survey Results

The 546 independent schools responding to the 1987-88 survey reported $471.4 million in private gifts, down $31.2 million, or 6.2 percent, from the $502.6 million raised by 532 schools in 1986-87.

This was the first year since 1982-83 that contributions to independent schools have fallen and follows two years of extraordinary increases averaging 16 percent annually. Last year, in constant dollars, giving was off by 10 percent.

A breakdown of support by category of school according to the level of program and type of student body is shown in **Table 11.** Day elementary schools received the smallest amount of support; the boarding and boarding/day schools secured the most. In terms of student body, the coeducational schools raised the most, but the boys' schools had the highest average — $1,129,261 compared with $848,542 for the coed schools and $722,761 for the girls' schools.

Cutbacks in giving affected all types of schools in 1987-88. Since the number of survey participants varies from year to year, two types of analysis are necessary to show changes over time. Using an average per institution corrects for different numbers of respondents in each year. And selecting those institutions participating in both the 1987-88 and the 1986-87 surveys — the "core" group — shows actual year-to-year changes.

Average support per institution fell by 8.6 percent, from $944,790 in 1986-87 to $863,462 for 1987-88. The day secondary and boarding and boarding/day schools experienced the greatest declines. For the 441 schools participating in both 1986-87 and 1987-88, contributions were down by $48 million, or 10.6 percent. The boarding and boarding/day schools accounted for most of the decline; their gifts fell by $31 million, or 18 percent. (See **Appendix Table D** for details by type of school.)

INDIVIDUALS CUT BACK

After increasing donations by more than 20 percent in 1986-87, individual donors cut back more than any other group in 1987-88. Still, they provided over three quarters of total reported support with alumni supplying the most, 32.2 percent, followed by parents and other individuals. **Table 12** presents data on the donors of voluntary support.

Both **alumni and parent** gifts fell by an average 15 percent. Contributions from **other individuals** — trustees, faculty and other friends of the schools — remained even with the previous year, primarily due to two large bequests totaling $32 million received in 1987-88. For the core group, donations from other individuals were down by 7 percent.

While individual giving was dropping, **foundation** grants grew substantially. Foundations were the only donor group to record increases for the core schools. Both the average per institution and the amount raised by the core group rose by more than 12 percent. As a result, foundations accounted for a larger share of total support — almost 15 percent compared to 12 percent in 1986-87.

Gifts from **corporations and businesses** decreased as a share of total support. They comprised 3.9 percent of the total in 1987-88, compared to a 4.6 percent share in 1986-87. Both the average per institution and the amount raised by the core group fell.

Donations from **religious groups** amounted to $6.6 million, or 1.4 percent of total reported support. The large increase in the average per institution was caused by 13 schools affiliated with religious denominations reporting to the survey for the first time with $4.1 million from religious denominations.

Finally, contributions from **other organizations** — clubs, special fund-raising events, etc. — were down slightly in 1987-88, whether measured by average support per institution or by giving to the core schools.

SPECIAL FORMS OF GIVING

Bequests and Deferred Gifts. Proceeds from estate settlements — realized bequests — rose sharply. In 1987-88 they amounted to $57.9 million, a $30 million increase over the bequests tallied the previous year. As a result, bequests accounted for a record 16 percent of individual giving. Two schools in Georgia received large sums from the estate of George Woodruff — the Westminister Schools, $20 million, and the Rabun Gap-Nacoochee school, $12 million, placing them number one and two in total voluntary support raised. Deferred gifts such as trusts, pooled income funds and annuities totaled $9.6 million,

down by $3 million from the $12.5 million reported in 1986-87. The boarding and boarding/day schools received two thirds of these gifts. (Additional details about bequests and deferred gifts by type of school can be found in **Appendix Table D.**)

Matching gifts accounted for 42.3 percent of the $18.3 million in corporate contributions. They totaled $7.7 million, a $300,000 decrease over the amount reported the previous year. The average corporate match was $384, down from $395 in 1986-87.

Gifts of company products and other property fell in 1987-88 both in dollar terms and as a share of corporate donations. Product gifts totaled $569,000, down from $1.9 million in 1986-87, with other in-kind corporate gifts amounting to $185,000. Together, products and property gifts comprised 4 percent of all corporate grants, compared to 9 percent last year.

After more than doubling in 1986-87, **property gifts** from noncorporate sources fell by $500,000 to $6.7 million in 1987-88. This type of giving includes real and personal property such as land, houses, paintings, antiques and rare books.

ALUMNI GIVING

Data on alumni giving for all purposes and for current operations by type of school are in **Appendix Table D.** The solicitation-effectiveness rate (the percentage of donors relative to the number of persons actually asked) stayed constant at 30 percent for overall alumni giving. The boarding and boarding/day schools had the highest rate, 35.1 percent; the day elementary schools the lowest, 16.6 percent. The average alumni gift was $405, down from $472 in the previous year. For current operations, solicitation effectiveness was 29 percent, dropping from 38.6 percent in 1986-87. For the core group of schools, however, the rate of annual giving did not change; their solicitation-effectiveness rate was 29.7 percent for this year and 29.8 percent for 1986-87. The average gift for annual giving was $174, up from $171 in the prior year.

WHERE THE FUNDS GO

Table 13 looks at changes between 1986-87 and 1987-88 in the purposes of gifts as specified by donors. Contributions for current operations showed an increase, while donations for capital purposes — buildings, equipment and unrestricted endowment — dropped. As a result, the share of total support designated for operating expenses rose to 38 percent, while capital donations fell by 3 percentage points to 62 percent of total contributions. Restricted endowment gifts rose, reflecting the large bequests from the Woodruff estate.

The decline in capital gifts followed an extraordinary increase in 1986-87 when capital support surged by $91 million, an increase of more than 20 percent.

Close to three fifths of capital support was designated for the schools' endowment; of that two thirds was restricted by the donors as to the uses of the endowment income.

In 1986-87, just over half of capital support went toward endowment, with 55 percent restricted. This year the percentage of unrestricted funds

(Figures in parentheses show percent of total in each column.)

earmarked for current operations increased, while that for unrestricted endowment decreased.

Table 14 examines the purposes designated by specific donor groups. Individuals and foundations directed a larger share of their support to capital needs, while corporations split their grants evenly between current operations and capital purposes. Religious organizations and other sources gave more for current expenses. This pattern has prevailed for the past several surveys.

Close to 87 percent of individual gifts for current operations were unrestricted; for organizations, just under three fifths. Foundations were the only donor group to designate more of these funds for restricted purposes; almost three fifths of foundation support for current operations was restricted.

Individuals designated three fifths of their capital gifts for the schools' endowments; foundations, corporations, religious organizations and other sources gave more capital funds for property, buildings and equipment. Two thirds of the funds for endowment had restrictions on the use of the endowment income. Parents were the only donor group to give more unrestricted donations to endowment.

SUPPLEMENTARY DATA

To facilitate studies of fund-raising effectiveness, schools were asked for additional information on enrollment, endowment, total educational expenditures and advancement-program expenses. **Table 15** presents advancement-program expenses as a a percentage of school expenditures and of total voluntary support by type of school. For all schools reporting these data, fund-raising expenses were 3.9 percent of school expenditures and 16.8 percent of total giving in 1987-88.

Data on total endowment and endowment per student by type of school are shown in **Table 16.**
